

Brief Contents

Part I Background

CHAPTER 1

The Development of Neuropsychology 1

CHAPTER 2

Origins of the Human Brain and Behavior 27

CHAPTER 3

Organization of the Nervous System 46

CHAPTER 4

The Structure and Electrical Activity of Neurons 74

CHAPTER 5

Communication Between Neurons 99

CHAPTER 6

The Influence of Drugs on Behavior 117

CHAPTER 7

Imaging the Brain's Activity 144

Part II Cortical Organization

CHAPTER 8

Organization of the Sensory Systems 173

CHAPTER 9

Organization of the Motor System 197

CHAPTER 10

Principles of Neocortical Function 221

CHAPTER 11

Cerebral Asymmetry 250

CHAPTER 12

Variations in Cerebral Asymmetry 282

Part III Cortical Functions

CHAPTER 13

The Occipital Lobes 318

CHAPTER 14

The Parietal Lobes 345

CHAPTER 15

The Temporal Lobes 370

CHAPTER 16

The Frontal Lobes 391

CHAPTER 17

Disconnection Syndromes 426

Part IV Higher Functions

CHAPTER 18

Memory 447

CHAPTER 19

The Origins of Language 483

CHAPTER 20

Emotion 516

CHAPTER 21

Spatial Behavior 546

CHAPTER 22

Attention, Mental Images, and Consciousness 576

Part V Plasticity and Disorders

CHAPTER 23

Brain Development and Plasticity 609

CHAPTER 24

Developmental Disorders 642

CHAPTER 25

Plasticity, Recovery, and Rehabilitation of the Adult Brain 670

CHAPTER 26

Neurological Disorders 697

CHAPTER 27

Psychiatric and Related Disorders 723

CHAPTER 28

Neuropsychological Assessment 751
