<i>Contributors</i>	page vii
<i>Preface</i>	ix
PART I INTRODUCTION	
1 Recognizing, Defining, and Representing Problems <i>Jean E. Pretz, Adam J. Naples, and Robert J. Sternberg</i>	3
2 The Acquisition of Expert Performance as Problem Solving: Construction and Modification of Mediating Mechanisms through Deliberate Practice <i>K. Anders Ericsson</i>	31
PART II RELEVANT ABILITIES AND SKILLS	
3 Is Success or Failure at Solving Complex Problems Related to Intellectual Ability? <i>Dorit Wenke and Peter A. Frensch</i>	87
4 Creativity: A Source of Difficulty in Problem Solving <i>Todd I. Lubart and Christophe Mouchiroud</i>	127
5 Insights about Insightful Problem Solving <i>Janet E. Davidson</i>	149
6 The Role of Working Memory in Problem Solving <i>David Z. Hambrick and Randall W. Engle</i>	176
7 Comprehension of Text in Problem Solving <i>Shannon Whitten and Arthur C. Graesser</i>	207
PART III STATES AND STRATEGIES	
8 Motivating Self-Regulated Problem Solvers <i>Barry J. Zimmerman and Magda Campillo</i>	233

9	Feeling and Thinking: Implications for Problem Solving <i>Norbert Schwarz and Ian Skurnik</i>	263
10	The Fundamental Computational Biases of Human Cognition: Heuristics That (Sometimes) Impair Decision Making and Problem Solving <i>Keith E. Stanovich</i>	291
11	Analogical Transfer in Problem Solving <i>Miriam Bassok</i>	343
PART IV CONCLUSIONS AND INTEGRATION		
12	Problem Solving – Large/Small, Hard/Easy, Conscious/Nonconscious, Problem-Space/Problem-Solver: The Issue of Dichotomization <i>Kenneth Kotovsky</i>	373
	<i>Index</i>	385
