

Attention, Balance and Coordination

The A.B.C.
of Learning
Success

Sally Goddard Blythe

with contributions by
Lawrence J. Beuret and Peter Blythe

CONTENTS

About the Author	ix
Contributors	xi
Preface	xiii
Acknowledgements	xix
1 Windows on the Brain	1
Introduction	1
Developmental Readiness for Education	2
What Is Neuro-developmental Delay?	3
What Is the Connection Between Neuro-developmental Delay and Specific Learning Difficulties?	4
Primitive and Postural Reflexes - the Medical Model	5
Neurological Dysfunction in Specific Learning Difficulties	7
Diagnostic Criteria, Signs, and Symptoms of Specific Learning Difficulties	9
Dyslexia - Signs and Symptoms	10
DCD (Dyspraxia)	13
Attention Deficit Disorder (ADD)	21
Underachievement	23
The Sensory-Motor Connection	23
Theories of Motor Control	25
2 The Significance of Primitive and Postural Reflexes	31
What Are Primitive and Postural Reflexes?	32
What Can Primitive and Postural Reflexes Tell Us?	32
The Developing Brain	33
The Emergence of Spinal Reflexes	34
Reflexes Mediated at the Spinal Level	35
Reflexes Mediated in the Brainstem	36

Reflexes as Reflections of Hierarchical Development	38
Areas of the Brain Involved in the Mediation of Primitive and Postural Reflexes.	42
The Multisensory Reflex - the Moro Reflex	45
Characteristics of the Fear Paralysis Reflex	53
Moro Reflex Activators.	56
Functions of the Moro Reflex	56
Physiological Response to the Moro Reflex	56
Implications of a Retained Moro Reflex	57
Symptoms of Scotopic Sensitivity Syndrome (SSS).	61
General Symptoms Associated with a Retained Moro Reflex	63
Behavioural Outcomes Associated with a Retained Moro Reflex	66
3 Primitive Reflexes of Position.	71
Tonic Labyrinthine Reflex (TLR).	71
Development of Head Control	74
Why Is Head Control So Important?.	78
The Tonic Labyrinthine Reflex (TLR) and Early Feeding.	78
Asymmetrical Tonic Neck Reflex (ATNR).	80
Symmetrical Tonic Neck Reflex (STNR).	89
4 Primitive Tactile Reflexes.	105
Palmar Grasp Reflex.	105
Plantar Reflex.	109
Rooting Reflex.	114
Suckling and Sucking Reflexes.	120
The Spinal Galant Reflex.	122
5 Postural Reflexes	135
Head Righting Reflexes.	139
Righting, Placing, and Equilibrium Reactions.	149
Parachute Reflex.	154
6 Use of the INPP Screening Questionnaire	157
The INPP Screening Questionnaire for Children.	159
How to Use the INPP Questionnaire.	161
7 Post-natal Factors Using the INPP Questionnaire.	201
Schooling	224
Scoring the INPP Questionnaire.	234
Research into the Reliability of the INPP Questionnaire.	234

8	The Development of the Vestibular-Cerebellar Theory.	239
	Origins.	240
	Development of Balance.	247
	Cerebellum and Balance.	247
	Significance of Vestibular Dysfunction.	265
	Symptoms of Vestibular Problems.	265
9	The Effects of Neuro-developmental Delay in Adults and in Adolescents.	271
	Problems in Higher Education.	274
	Vestibular Connections to the Reticular Activating System (RAS).	278
	Adolescent and Adult Manifestations of NDD - a Clinical Perspective	292
10	Development of the INPP Method - from Theory to Fact	311
11	Other Factors in Specific Learning Difficulties.	325
	Unravelling the Threads.	325
	Use of Physical Tests to Assess Neurological Readiness in Schools.	347
	Application of the INPP Method.	358
	The Neuro-educator.	359
	Attention, Balance, and Coordination.	361
Appendix 1	Screening for Neurological Dysfunction in the Specific Learning Difficulty Child.	365
	Abstract.	365
	Introduction.	366
	Early Identification.	367
	Aim of the Study.	368
	Method.	368
	Analysis of the Questionnaire as a Means of Identifying Specific Learning Difficulties.	370
	Analysis of Individual Questions.	370
	Results.	371
	Discussion.	371
	Conclusions.	375
Appendix 2	Frequency Range of Vocals and Musical Instruments.	379

Glossary of Terms	381
Bibliography	389
Index	411
