Donald A. McQuarrie

Second Edition

# Contents

Preface to the Second Edition xi

## **CHAPTER 1 / The Dawn of the Quantum Theory 1**

- 1.1 Blackbody Radiation 2
- 1.2 Planck's Quantum Hypothesis 4
- 1.3 The Photoelectric Effect 8
- 1.4 Vibrations of Atoms in Crystals 11
- 1.5 The Hydrogen Atomic Spectrum 12
- 1.6 The Rydberg Formula 15
- 1.7 Angular Momentum 16
- 1.8 Quantized Angular Momentum 18
- 1.9 Reduced Mass 22
- 1.10 De Broglie Waves 26
- 1.11 The Relation between de Broglie Waves and Quantized Angular Momentum 28
- 1.12 De Broglie Waves Observed 29
- 1.13 Two-Slit Experiments 30
- 1.14 The Heisenberg Uncertainty Principle 34
  - Problems 36
  - References 44

## **MATHCHAPTER A / Complex Numbers 45**

Problems 49

## **CHAPTER 2 / The Classical Wave Equation 53**

- 2.1 The One-Dimensional Classical Wave Equation 54
- 2.2 Separation of Variables 54
- 2.3 Oscillatory Solutions to Differential Equations 58
- 2.4 Superposition of Normal Modes 61
- 2.5 A Vibrating Membrane 64
- 2.6 Interference of Waves 68
  - Problems 72
  - References 84

**CHAPTER 3** / The Schrodinger Equation and a Particle in a Box 97

- 3.1 The Schrodinger Equation 97
- 3.2 Linear Operators in Quantum Mechanics 99
- 3.3 Eigenvalue Problems In Quantum Mechanics 101
- 3.4 Wave Functions and Their Probabilistic Interpretation 103
- 3.5 Quantized Energies 105
- 3.6 Normalized Wave Functions 107
- 3.7 Average Quantities in Quantum Mechanics 110
- 3.8 The Uncertainty Principle and Operators 112
- 3.9 Particle in a Three-Dimensional Box 114
  - Problems 120
  - References 128

**MATHCHAPTER C** / Vectors 129

**CHAPTER 4** / The Postulates and General Principles of Quantum Mechanics 143

- 4.1 State Functions 143
- 4.2 Quantum-Mechanical Operators and Classical Variables 147
- 4.3 Observable Quantities and Eigenvalues 149
- 4.4 Commutators and the Uncertainty Principle 153
- 4.5 Hermitian Operators 156
- 4.6 Hermitian Operators and Orthogonality 160
- 4.7 Commuting Operators and Mutual Eigenfunctions 164
- 4.8 Probability of a Measurement and Fourier Coefficients 165
- 4.9 The Time-Dependent Schrodinger Equation 170
- 4.10 Quantum Mechanics and the Two-Slit Experiment 175
  - Problems 179
  - References 196

**MATHCHAPTER D** / Series and Limits 197

**CHAPTER 5** / The Harmonic Oscillator and Vibrational Spectroscopy 207

- 5.1 Classical Harmonic Oscillator 207
- 5.2 Conservation of Energy of a Classical Harmonic Oscillator 210
- 5.3 Harmonic-Oscillator Model of a Diatomic Molecule 213
- 5.4 The Harmonic-Oscillator Approximation 215
- 5.5 The Energy Levels of a Quantum-Mechanical Harmonic Oscillator 218
- 5.6 Infrared Spectra of Diatomic Molecules 219

5.7	Overtones in Vibrational Spectra	222
5.8	Harmonic-Oscillator Wave Functions	225
5.9	Parity of Hermite Polynomials	228
5.10	Relations Among Hermite Polynomials	230
5.11	Normal Coordinates	233
5.12	Harmonic-Oscillator Selection Rule	237
	Appendix: Operator Method Solution to the Schrodinger Equation for a Harmonic Oscillator	239
	Problems	243
	References	254

## **MATHCHAPTER E / Spherical Coordinates 255**

Problems 263

## **CHAPTER 6 / The Rigid Rotator and Rotational Spectroscopy 267**

6.1	The Energy Levels of a Rigid Rotator	267
6.2	The Rigid Rotator Model of a Diatomic Molecule	272
6.3	Rotation-Vibrational Spectra	275
6.4	Rotation-Vibration Interaction	278
6.5	A Nonrigid Rotator	281
6.6	Spherical Harmonics	282
6.7	Rigid-Rotator Selection Rule	288
6.8	Angular Momentum and Measurements	290
	Appendix: Determination of the Eigenvalues of $L^2$ and $L_z$ by Operator Methods	296
	Problems	300
	References	308

## **MATHCHAPTER F / Determinants 309**

Problems 317

## **CHAPTER 7 / The Hydrogen Atom 321**

7.1	The Schrödinger Equation for a Hydrogen Atom	321
7.2	$s$ Orbitals	327
7.3	$p$ Orbitals	334
7.4	The Zeeman Effect	339
7.5	Electron Spin	344
7.6	Spin-Orbit Interaction	349
7.7	Hydrogen Atomic Term Symbols	353
7.8	The Zeeman Effect Revisited	357
7.9	The Schrödinger Equation for a Helium Atom	359
	Problems	360
	References	366

## **MATHCHAPTER G / Matrices 367**

Problems 376

## **CHAPTER 8 / Approximation Methods 381**

- 8.1 The Variational Method 381
- 8.2 Trial Functions That Depend Linearly on Variational Parameters 387
- 8.3 Trial Functions That Depend Nonlinearly on Variational Parameters 395
- 8.4 Introduction to Perturbation Theory 396
- 8.5 First-Order Perturbation Theory 399
- 8.6 Selection Rules and Time-Dependent Perturbation Theory 404
  - Problems 410
  - References 426

## **MATHCHAPTER H / Matrix Eigenvalue Problems 427**

- Problems 432

## **CHAPTER 9 / Many-Electron Atoms 435**

- 9.1 Atomic Units 435
- 9.2 Classic Calculations on a Helium Atom 439
- 9.3 Hartree-Fock Equations for a Helium Atom 444
- 9.4 Antisymmetry of Electronic Wave Functions 447
- 9.5 Slater Determinants 450
- 9.6 The Hartree-Fock-Roothaan Method 453
- 9.7 Hartree-Fock-Roothaan Results for Atoms 458
- 9.8 Correlation Energy 463
- 9.9 Atomic Term Symbols 466
- 9.10 Addition of Angular Momenta 470
- 9.11 Hund's Rules 474
- 9.12 Atomic Term Symbols and Atomic Spectra 475
- 9.13 Russell-Saunders Coupling 479
  - Appendix: An SCF Calculation of a Helium Atom 482
  - Problems 489
  - References 497

## **CHAPTER 10 / The Chemical Bond: One- and Two-Electron Molecules 499**

- 10.1 The Born-Oppenheimer Approximation 500
- 10.2 The Hydrogen Molecular Ion, 501
- 10.3 Molecular Orbitals Constructed from a Linear Combination of Atomic Orbitals 506
- 10.4 Bonding and Antibonding Orbitals 513
- 10.5 Molecular Orbital Theory and the Virial Theorem 515
- 10.6 Polarization Terms in Basis Sets 521
- 10.7 The Schrodinger Equation for H<sub>2</sub> 523
- 10.8 Molecular Orbital Theory Results for H<sub>2</sub> 526
- 10.9 Configuration Interaction 531
- 10.10 An SCF Calculation on H<sub>2</sub> 537
  - Appendix: Molecular Orbital Theory of H<sub>2</sub> 543
  - Problems 547
  - References 557

## **CHAPTER 11 / Qualitative Theory of Chemical Bonding 559**

- 11.1 Molecular Orbitals 560
- 11.2 Molecular Electron Configurations 564
- 11.3 Molecular Orbital Theory and Heteronuclear Diatomic Molecules 570
- 11.4 Molecular Term Symbols 573
- 11.5 Molecular Term Symbols and Symmetry Properties 577
- 11.6 The Electron Approximation 581
- 11.7 Huckel Molecular Orbital Theory and Bond Orders 588
- 11.8 Huckel Molecular Orbital Theory in Matrix Notation 595
  - Problems 597
  - References 605

## **CHAPTER 12 / The Hartree-Fock-Roothaan Method 607**

- 12.1 The Hartree-Fock-Roothaan Equations 608
- 12.2 Minimal Gaussian Basis Sets 614
- 12.3 Extended Gaussian Basis Sets 621
- 12.4 Basis Sets with Orbital Polarization Terms 626
- 12.5 Using Gaussian 03 and WebMO 631
- 12.6 Hartree-Fock-Roothaan Results 636
- 12.7 Post-Hartree-Fock Methods 643
  - Problems 653
  - References 660
  - References for Post-Hartree-Fock Methods 660

Answers to the Numerical Problems 663
