List Of Principal Results xiii

List Of Examples xv

1 PROBABILITY SAMPLING FROM A FINITE UNIVERSE 1

1.1 Introduction . . . 1
1.2 Probability Sampling . . . 2
1.2.1 Basic properties of probability samples . . . 2
1.2.2 Poisson sampling . . . 16
1.2.3 Stratified sampling . . . 18
1.2.4 Systematic sampling . . . 22
1.2.5 Replacement sampling . . . 25
1.2.6 Rejective sampling . . . 27
1.2.7 Cluster samples . . . 28
1.2.8 Two-stage sampling . . . 29
1.3 Limit Properties . . . 35
1.3.1 Sequences of estimators . . . 35
1.3.2 Central limit theorems . . . 42
1.3.3 Functions of means . . . 57
1.3.4 Approximations for complex estimators . . . 64
1.3.5 Quantiles . . . 69
1.4 Methods of Unequal Probability Sample Selection . . . 72
1.5 References . . . 75
1.6 Exercises . . . 76
1.7 Appendix 1 A: Some Order Concepts . . . 90

2 USE OF AUXILIARY INFORMATION IN ESTIMATION 95

2.1 Ratio Estimation . . . 96

2.2 Regression Estimation . . . 100
2.2.1 Simple random sampling under the normal model . 100
2.2.2 General populations and complex samples . . . 106
2.2.3 Poststratification . . . 124
2.2.4 Residuals for variance estimation . . . 126
2.3 Models and Regression Estimation . . . 127
2.3.1 Linear models . . . 127
2.3.2 Nonlinear models . . . 137
2.4 Regression and Stratification . . . 139
2.5 Estimation with Conditional Probabilities . . . 144
2.6 Regression for Two-Stage Samples . . . 148
2.7 Calibration . . . 158
2.8 Weight Bounds . . . 163
2.9 Maximum Likelihood and Raking Ratio . . . 165
2.10 References . . . 166
2.11 Exercises . . . 167
2.12 Appendix 2A: Missouri Data . . . 178

3 USE OF AUXILIARY INFORMATION IN DESIGN 181
3.1 Introduction . . . 181
3.1.1 Selection probabilities . . . 183
3.1.2 Strata formation . . . 189
3.1.3 Stratification and variance estimation . . . 199
3.1.4 Controlled two-per-stratum design . . . 203
3.1.5 Design for subpopulations . . . 206
3.2 Multiple-Stage Samples . . . 208
3.2.1 Cluster sampling . . . 208
3.2.2 Two-stage sampling . . . 212
3.3 Multiple-Phase Samples . . . 215
3.3.1 Two-phase samples . . . 215
3.3.2 Three-phase samples . . . 231
3.3.3 Separate samples with common characteristics . . . 234
3.3.4 Composite estimation . . . 235
3.4 Rejective sampling . . . 236
3.5 References . . . 244
3.6 Exercises . . . 244

4 REPLICATION VARIANCE ESTIMATION 251
4.1 Introduction . . . 251
4.2 Jackknife Variance Estimation . . . 252
4.2.1 Introduction . . . 252
4.2.2 Stratified samples . . . 256

4.2.3 Quantiles . . . 259
4.3 Balanced Half-Samples . . . 260
4.4 Two-Phase Samples . . . 261
4.5 The Bootstrap . . . 271
4.6 References . . . 275
4.7 Exercises . . . 275

5 MODELS USED IN CONJUNCTION WITH SAMPLING 281
5.1 Nonresponse . . . 281
5.1.1 Introduction . . . 281
5.1.2 Response models and weighting . . . 282
5.2 Imputation . . . 288
5.2.1 Introduction . . . 288
5.2.2 Fractional imputation . . . 290
5.2.3 Nearest-neighbor imputation . . . 295
5.2.4 Imputed estimators for domains . . . 302
5.3 Variance Estimation . . . 305
5.4 Outliers and Skewed Populations . . . 309
5.5 Small Area Estimation . . . 311
5.6 Measurement Error . . . 324
5.6.1 Introduction . . . 324
5.6.2 Simple estimators . . . 325
5.6.3 Complex estimators . . . 329
5.7 References . . . 334
5.8 Exercises . . . 334

6 ANALYTIC STUDIES 341
6.1 Introduction . . . 341
6.2 Models and Simple Estimators . . . 342
6.3 Estimation of Regression Coefficients . . . 349
6.3.1 Ordinary least squares and tests for bias . . . 349
6.3.2 Consistent estimators . . . 355
6.4 Instrumental variables . . . 371
6.4.1 Introduction . . . 371
6.4.2 Weighted instrumental variable estimator . . . 371
6.4.3 Instrumental variables for weighted samples . . . 372
6.4.4 Instrumental variable pretest estimators . . . 374
6.5 Nonlinear models . . . 377
6.6 Cluster and multistage samples . . . 382
6.7 Pretest procedures . . . 385
6.8 References . . . 388
6.9 Exercises . . . 389
