<b>Rationale and Structure</b>	<b>1</b>
<b>Background</b>	<b>1</b>
<b>How to use this book</b>	<b>2</b>
<b>The structure of this book</b>	<b>3</b>
<b>The Young People's Perceptions Project</b>	<b>3</b>
<b>1 Processes and Tasks in Using Qualitative Software</b>	<b>5</b>
<b>Types of software supporting work with qualitative data</b>	<b>6</b>
<b>What types of software do we categorize as CAQDAS?</b>	<b>6</b>
<b>Which is the 'best' CAQDAS package?</b>	<b>8</b>
<b>Basic functionality and aspects of work in CAQDAS: key similarities</b>	<b>8</b>
<b>Structure of work in CAQDAS packages</b>	<b>8</b>
<b>Data types and format</b>	<b>10</b>
<b>'Closeness to data' and interactivity</b>	<b>10</b>
<b>Exploring data</b>	<b>10</b>
<b>Code and retrieve functionality</b>	<b>10</b>
<b>Coding schema</b>	<b>11</b>
<b>Data organization</b>	<b>11</b>
<b>Searching and interrogating the database</b>	<b>11</b>
<b>Writing tools</b>	<b>11</b>
<b>Output</b>	<b>12</b>
<b>Making software work for your project</b>	<b>12</b>
<b>Starting points</b>	<b>12</b>
<b>Familiarization</b>	<b>12</b>
<b>What the software project represents</b>	<b>12</b>
<b>CAQDAS packages as project management tools</b>	<b>13</b>
<b>The right tools for the job</b>	<b>13</b>
<b>Flexibility in the sequencing of tasks</b>	<b>14</b>
<b>The bits in between</b>	<b>14</b>
<b>Teamwork</b>	<b>15</b>

<b>2</b>	<b>Data and Their Preparation for CAQDAS Packages</b>	<b>16</b>
	Types of qualitative data	17
	Incorporating different types of data into the software project	17
	Incorporating different types of data into the Young People's Perceptions Project	19
	Textual data preparation considerations	19
	General guidelines for transcribing data	20
	Transcription formats	20
	Using rich text features to indicate important aspects of the data	20
	Formatting structured data	21
	Recognizable units of context: sentences, paragraphs and sections	21
	Speaker and topic identifiers	22
	What to avoid when transcribing identifiers	23
	Naming and saving data files	23
	Software-specific textual data preparations	23
	Preparing textual data for ATLAS.ti5	24
	Preparing textual data for MAXqda2	26
	Preparing textual data for NVivo7	28
	Summary: data preparation issues	29
	Comparative comments on data and their preparation for CAQDAS packages	30
<b>3</b>	<b>Getting Started in Qualitative Software: Practical Tasks</b>	<b>32</b>
	Generic tasks: what can be done before primary data are ready?	32
	Task 3.1 creating and naming the project, data files and reports	33
	Task 3.2 familiarize yourself with the software	34
	Task 3.3 memoing	34
	Task 3.4 code creation	34
	Task 3.5 experimenting with importing/assigning data	35
	Task 3.6 experiment with data	35
	Task 3.7 experiment with mapping tools	35
	Task 3.8 use or throw away	36
	Software-specific variations: getting started with software	36
	Exercises in ATLAS.ti5	36
	Exercises in MAXqda2	44
	Exercises in NVivo7	49
	Summary: reviewing the process of familiarization	54
	Comparative comments on getting started with the software	54
<b>4</b>	<b>Exploration and Text-Level Work</b>	<b>56</b>
	Early exploration of text	57
	Technological developments and methodological debates	57
	Annotation tools: their <i>universal</i> utility	59

Note taking for continuity, neutrality, reflexivity and openness	59
Text search tools: their <i>universal</i> utility	59
The place of content-based searching tools	60
Hyperlinking	60
Generic tasks: exploring data and working at the text level in software	61
Task 4.1 Using cosmetic text marking and functional text marking	61
Task 4.2 Annotating text	62
Task 4.3 Frequency counts, text searching for words or phrases	62
Task 4.4 Hyperlinking between points in the text	63
Software-specific variations: exploring data and working at the text level	64
Exercises in ATLAS.ti5	64
Exercises in MAXqda2	69
Exercises in NVivo7	74
Summary: early exploration of data	78
Comparative comments on exploring data	79
5 Qualitative Coding in Software: Principles and Processes	81
What is qualitative coding?	81
How coding works in qualitative software	82
Approaches to coding	82
Generating and using codes	83
Inductive approaches to coding	84
Deductive approaches to coding	85
Combining approaches: the practice of coding using software	88
Summary: using software to support your approach to coding	89
6 Coding Schemes, Coding Frames	91
Breaking down the data, putting them back together	92
Structures of coding schemes in software	93
Hierarchical systems	93
The functioning of hierarchies in software	93
Non-hierarchical systems	93
What are the benefits and disadvantages of different structures?	94
Factors which influence approaches to the development of coding schemes	95
Is 'coding scheme' the same as 'theoretical framework'?	96
Drilling down, or building up?	96
Seeing beyond the coding scheme: grouping and combining codes	97
Coding scheme predicaments	97
Working top-down, feeling stuck between tramlines?	97
The 'large' coding scheme: moving on, refining?	100
Coding scheme structures in CAQDAS packages: project examples	100
Speller (2000): 'The relocation of Arkwright'	101

Rich et al. (2006): 'Video intervention/prevention assessment (VIA)'	103
Taggart et al. (2004): 'Curriculum progression in the arts'	105
Silver (2002): 'Young People's Perceptions Project'	107
Lewins (2000): 'Older people's needs assessment exercise: focus groups'	110
Gulati (2006): 'Understanding knowledge construction in online courses'	113
Summary: making the most of a coding scheme	115
Comparative comments on coding schemata in CAQDAS packages	115
<b>7 Coding Tasks in Software</b>	<b>117</b>
Generic tasks: generating and applying codes	118
Task 7.1 Generating codes	118
Task 7.2 Applying existing codes to text	118
Task 7.3 Defining and listing codes	118
Task 7.4 Changing your mind about how data are coded	119
Task 7.5 Reorganizing the coding schema	119
Integrating the different aspects of your work	120
Software-specific variations: coding processes in software	120
Exercises in ATLAS.ti5	120
Exercises in MAXqda2	127
Exercises in NVivo7	133
Summary: getting started with coding in software	141
Comparative comments on coding functionality and processes	141
<b>8 Basic Retrieval of Coded Data</b>	<b>143</b>
Purposes and values of basic retrieval	144
Where did I get to last time?	144
Reflexivity and rigour	144
Generic tasks: retrieving coded data	145
Task 8.1 Retrieve all data coded so far	145
Task 8.2 View all codes appearing in one document	145
Task 8.3 Recode data	146
Task 8.4 Overview current coding status	146
Software-specific variations: data retrieval	147
Exercises in ATLAS.ti5	147
Exercises in MAXqda2	151
Exercises in NVivo7	156
Summary: basic ways to retrieve coded data	160
Comparative comments on retrieval functionality and processes	160
<b>9 Managing Processes and Interpretations by Writing</b>	<b>163</b>
The importance of writing in conducting qualitative data analysis	164
Writing as a continuous analytic process	165

<b>Forms and purposes of writing</b>	<b>165</b>
Field notes	165
Research journal(s)	166
Analytic or theoretical memos	166
<b>The potential value of software writing tools</b>	<b>167</b>
<b>Generic tasks for using memos</b>	<b>168</b>
Managing your memo system	169
Creating memos	169
Free-standing centralized memos	169
Naming and dating memos	169
Grouping memos	170
Structuring memos	170
<b>Integrating your writing with the rest of your project</b>	<b>170</b>
Linking memos to documents	171
Linking memos to codes	171
Coding your own writing	171
Search the content of a memo	171
Outputting memos	171
<b>Software-specific memo functionality</b>	<b>172</b>
Memos in ATLAS.ti5	172
Memos in MAXqda2	174
Memos in NVivo7	175
<b>Summary: flexible writing in software</b>	<b>177</b>
<b>Comparative comments on memo functionality</b>	<b>178</b>
<b>10 Mapping Ideas and Linking Concepts</b>	<b>179</b>
<b>Theoretical models</b>	<b>180</b>
Adaptive theory and the modelling process	180
Grounded theory and the mapping process	180
<b>Mapping tools: relevant traditions</b>	<b>180</b>
<b>Mapping software packages</b>	<b>181</b>
<b>Mapping in CAQDAS packages: general purposes</b>	<b>181</b>
Limits of CAQDAS mapping tools	182
Possibilities with CAQDAS mapping tools	183
Cautions	183
<b>Generic tasks: mapping and linking</b>	<b>183</b>
<b>Software-specific mapping tools</b>	<b>185</b>
The networking tool in ATLAS.ti5	185
The mapping tool in MAXqda2	186
The modeller in NVivo7	190
<b>Summary: mapping functionality</b>	<b>191</b>
<b>Comparative comments on mapping functionality</b>	<b>191</b>

<b>11</b>	<b>Organizing Data to Known Characteristics</b>	<b>194</b>
	The importance of organizing qualitative data	195
	Features in data which can be organized	195
	Organizing qualitative data in CAQDAS packages	196
	Document 'families' and 'attributes'	196
	Differentiating between organizational features and 'conceptual' codes	196
	Working incrementally	197
	Organizing whole data files	197
	Organizing parts of data files	198
	Organizing case studies	199
	Software-specific variations: data organization	199
	Exercises in ATLAS.ti5	199
	Exercises in MAXqda2	200
	Exercises in NVivo7	205
	Summary: data organization functionality	208
	Comparative comments on data organization	208
<b>12</b>	<b>Interrogating the Dataset</b>	<b>209</b>
	Moving on	210
	Different ways to interrogate the database	210
	Filtering and simple forms of retrieval	210
	Searching for content	211
	Code searches as iterative, incremental and repeatable	211
	Qualitative cross-tabulations in the form of tables and matrices	211
	Interrogating in maps	212
	Changing techniques of qualitative data analysis	212
	Cautions	212
	Generic tasks: searching	213
	Searching for content	213
	Code searching	214
	Generating tabular data	214
	Creating signposts from searches	214
	Software-specific searching functions	214
	Searching and interrogation tools in ATLAS.ti5	216
	Searching and interrogation tools in MAXqda2	219
	Searching and interrogation tools in NVivo7	223
	Summary: reviewing searching and interrogation functionality	225
	Comparative comments on searching and interrogating the dataset	226
<b>13</b>	<b>Convergence, Closeness, Choice</b>	<b>227</b>
	Planning for the use of software	227
	Convergence of tasks and tools: software as a container for your work	228

<b>Closeness to data: inside software and outside it</b>	<b>228</b>
<b>Working within your comfort zone: focused effective use of software</b>	<b>229</b>
<b>Appendix A Background and Summary of Example Projects</b>	<b>231</b>
<b>Appendix B Keyboard Shortcuts for ATLAS.ti5, MAXqda2 and NVivo7</b>	<b>238</b>
<b>Appendix C Features and Functions of Seven CAQDAS Packages</b>	<b>241</b>
<b>ATLAS.ti5</b>	<b>241</b>
<b>HyperRESEARCH 2.6</b>	<b>246</b>
<b>MAXqda2</b>	<b>252</b>
<b>QDA Miner 2.0</b>	<b>257</b>
<b>QSR NVivo7</b>	<b>262</b>
<b>Qualrus</b>	<b>267</b>
<b>Transana 2</b>	<b>273</b>
