**CONTENT
ANALYSIS**

An Introduction
to Its
Methodology

The SAGE COMMTEXT Series

CONTENTS

<i>Preface</i>	7
<i>Foreword</i>	9
1 History	13
Quantitative Newspaper Analysis / Early Content Analysis / Propaganda Analysis / Content Analysis Generalized / Computer Text Analysis	
2 Conceptual Foundations	21
Definition / Elaborations / Framework / Distinctions	
3 Uses and Kinds of Inference	33
Systems / Standards / Indices and Symptoms / Linguistic Representations / Communications / Institutional Processes	
4 The Logic of Content Analysis Designs	49
Scientific Information Processing / Types of Designs / Components of Content Analysis	
5 Unitizing	57
Types of Units of Analysis / Ways of Defining Units / Efficiency and Reliability	
6 Sampling	65
Types of Sampling Schemes / Sample Size	
7 Recording	71
Observers / Training / Semantics of Data / Data Sheets	
8 Data Languages	85
Definition / Variables / Order / Metric	

9	Constructs for Inference	99
	Sources of Uncertainties / Sources of Certainties / Types of Constructs	
10	Analytical Techniques	109
	Frequencies / Associations, Correlations, and Cross- Tabulations / Images, Portrayals, and Discriminant Analysis / Contingencies, Contingency Analysis / Clustering / Contextual Classification	
11	The Use of Computers	119
	Statistical Analyses / Computational Aids for Survey and Discovery / Computational Content Analysis	
12	Reliability	129
	Reliability Designs / Agreement / Data Reliability and Standards / Diagnostic Devices	
13	Validity	155
	A Typology for Validation Efforts / Semantical Validity / Correctional Validity / Predictive Validity / Construct Validity	
14	A Practical Guide	169
	Design / Execution / Report	
	<i>References</i>	181
	<i>About the Author</i>	191
