

**AN INTEGRATED THEORY OF
LINGUISTIC DESCRIPTIONS**

JERROLD J. KATZ

PAUL M. POSTAL

CONTENTS

1. INTRODUCTION	1
2. THE SYNTACTIC AND SEMANTIC COMPONENTS	6
2.1 The Syntactic Component	6
2.2 The Semantic Component	12
3. PROJECTION RULES	30
3.1 Introduction	30
3.2 Semantic Interpretation of Structures Derived Solely by Singulary Transformations	31
3.3 Semantic Interpretation of Structures Derived with Generalized Transformations	46
3.4 Readings for Constituents	64
3.5 The Formalization of the Restriction of Projection Rules to Underlying P-markers	66
3.6 Application to Definitions of Semantic Properties of Sentences	66
3.7 A Way of Eliminating P2	67
4. APPARENT COUNTEREXAMPLES	71
4.1 Introduction	71
4.2 Apparent Counterexamples in the Case of Singulary Transformations	72
4.2.1 Passive Cases	72
4.2.2 Negative Cases	73
4.2.3 Imperative Cases	74
4.2.4 Question Cases	79
4.2.5 Relations between Sentences	117
4.3 Apparent Counterexamples in the Case of Gen- eralized Transformations	120
5. CONCLUSION	157
5.1 A Heuristic Principle	157
5.2 Implications for the Syntactic Component	157
5.3 Universals in Linguistic Descriptions	159
5.4 Implications for Models of Speech Recognition and Speech Production	166
5.5 Implications for the Theory of Language Learning	172
BIBLIOGRAPHY	175
