

Semantic and Conceptual Development

An Ontological Perspective

Frank C. Keil

Harvard University Press
Cambridge, Massachusetts
and London, England
1979

Contents

1. Introduction	1
<hr/>	
2. The Phenomena	3
Sentences That Do Not Make Sense 3	
Naturalness of Classes 4 • Similarity of Natural Classes 4 • Naturalness of Copredications 4	
<hr/>	
3. Developing a Theory	7
Goals 7 • Underlying Knowledge 10 • Historical Antecedents 11 • Sommers' Theory 13 Relation to the Phenomena 18	
<hr/>	
4. Empirical Evaluation	24
On Using Intuitions 24 • The Study of Anomaly 26 • The Study of Natural Classes 31 The study of Class Similarity 35 • The Study of Copredication 40 • Methodological Issues 43	
<hr/>	
5. Other Psychological Research	46
Semantic Memory Research 46 • Natural Categories 50 • Anomaly 54 • Possible Lexical Items 57 • Similarity 58 • Metaphor 61	
<hr/>	
6. Origins of Ontological Knowledge	63
Children's Intuitions of Anomaly 65 • The First Grade-School Study 67 • Tree Representations 71 • Increasing Differentiation 74 • Ordered and Asymmetrical Differentiation 75 • Terms Denoting Classes	

Before Predicates 79 • Methodological Issues 80 Limitations and Unanswered Questions 83	
<hr/>	
7. Follow-up Studies	85
The Second Grade-School Study 85 • The M Constraint 92 • Four Representative Cases 95 Developmental Patterns Reconsidered 101 The Preschool Study 106 • A Study in a Different Language 111	
<hr/>	
8. Other Developmental Research	119
Anomaly 119 • Word Meaning 121 Hierarchical Organization of Word Meaning 125 Realism 127 • Metaskills 129 • Causality 130 Animism 131 • Classification 133 Hierarchical Tree Structures 137	
<hr/>	
9. A Closer Look at the Theory	140
Downward Tree Proliferation 140 • Possible M-Constraint Violations 147 • Contextual Influences 151 • n-Place Predicates 152 Classes Without Unique Predicates 153 Distinguishing Metaphorical and Literal Meaning 153 • Modal Notions 154 • Other Ontological Systems 156 • The Predicability Tree and Conceptual Knowledge 161	
<hr/>	
10. Constraints and Development	165
Reasons for the M Constraint 165 • How Trees Develop 170	
<hr/>	
Appendix A. Sommers' Proof of the Law of Categorical Inclusion	175
Appendix B. Generating an M-Constrained Matrix from Random Data	177
Appendix C. Three Grade-School Studies	180
