

# PHONEMICS

A TECHNIQUE  
FOR REDUCING LANGUAGES  
TO WRITING

by Kenneth L. Pike

ANN ARBOR / THE UNIVERSITY OF MICHIGAN PRESS

## CONTENTS

Chapter		Page
FOREWORD by Charles C. Fries . . . . .		v
PREFACE . . . . .		vii
<b>PART I. ANALYSIS AND PRODUCTION OF PHONETIC UNITS</b>		
<b>1. PHONETIC SYMBOLISM . . . . .</b>		<b>3</b>
The Value and Basis of Formulas for Sound Production . . . . .		3
Productive and Controlling Mechanisms for Sounds . . . . .		3
Static Diagrams for Sounds . . . . .		8
Sequence Diagrams for Sounds . . . . .		9
<b>2. PHONETIC EXERCISES FOR PRODUCING SOUND TYPES . . . . .</b>		<b>12</b>
Mimicry . . . . .		12
Vocoids . . . . .		13
Segmental Modifications of Vocoids . . . . .		14
Lip Modifications of Vocoids . . . . .		14
Tongue Modifications of Vocoids . . . . .		15
Vocoid Modification by Retroflexion . . . . .		19
Vocoid Modification by Nasalization . . . . .		20
Modifications of Vocoids by Changes at the Vocal Cords . . . . .		21
Pharyngeal Modification of Vocoids . . . . .		21
Modification of Vocoids by Direction of Air Stream . . . . .		22
Vocoid Practice in Sequences . . . . .		22
Suprasegmental Modification of Vocoids . . . . .		23
Quantitative Modification of Vocoids . . . . .		23
Intensity Modification of Vocoids . . . . .		23
Pitch Modification of Vocoids . . . . .		23
Vocoid Modification by Placement in the Syllable . . . . .		24
Nonvocoids . . . . .		24
Nonvocoid Fricatives with a Pulmonic Air Stream . . . . .		24
Nonvocoids with Oral Friction . . . . .		24
Oral Fricatives Modified by Voicing . . . . .		27
Oral Fricatives Modified by Nasalization . . . . .		28
Oral Fricatives Modified by an Additional Nonfricative Articulator . . . . .		28
Nonvocoids with Friction in the Throat . . . . .		29
Fricatives Modified by an Ingressive Air Stream to the Lungs . . . . .		29
Fricatives Modified by Strength of Articulation . . . . .		29
Fricatives Modified by Quantity . . . . .		29
Fricatives Modified by Pitch . . . . .		30
Fricatives Modified by Relation to the Syllable . . . . .		30
Nonvocoid Sounds with Complete Interruption of a Pulmonic Air Stream . . . . .		30
Aspirated, Voiceless, and Voiced Stops . . . . .		30

Chapter		Page
	Fronted and Backed Varieties of Stops . . . . .	32
	Stops Modified by an Additional Nonfricative Articulator . . . . .	32
	Stops with Fricative Release . . . . .	33
	Pharyngeal Stops . . . . .	33
	Glottal Stop . . . . .	33
	Double Stops . . . . .	34
	Stops Modified by Nasalization . . . . .	34
	Stops Modified by Strength of Articulation . . . . .	34
	Stops Modified by Length . . . . .	34
	Stops Modified by Pitch . . . . .	34
	Stops Modified by an Ingressive Air Stream to the Lungs . . . . .	35
	Nasals . . . . .	35
	Nasals Modified in Various Ways . . . . .	36
	Frictionless Laterals . . . . .	36
	Frictionless Laterals Modified in Various Ways . . . . .	36
	Nonvocal Sounds with Flapped or Trilled Articulation . . . . .	36
	Nonvocal Sounds with a Nonpulmonic Air Stream . . . . .	38
	Glottalized and Implosive Sounds . . . . .	38
	Clicks . . . . .	41
	Sequences of Vocoids and Nonvocoids . . . . .	42
3. SELECTIONS FOR READING . . . . .		44
	Dialect Sample A . . . . .	44
	Dialect Sample B . . . . .	44
	Selection 1: The Sea Serpent . . . . .	47
	Selection 2: A Sample Transcription . . . . .	48
	Selection 3: The Friendly West . . . . .	48
	Selection 4: Baby Talk . . . . .	49
	Selection 5: Aesop's Fables (Number Three) . . . . .	49
	Selection 6: The Scorpion . . . . .	50
	Selection 7: English Modifications for Practice . . . . .	52
	Selection 8: Aztec Text . . . . .	53
	Selection 9: Popoluca Text . . . . .	55
<b>P A R T   I I .   A N A L Y S I S   A N D   D E S C R I P T I O N O F   P H O N E M I C   U N I T S</b>		
4. THE PREMISES OF PRACTICAL PHONEMICS . . . . .		57
	The Relationship of Phonetics and Phonemics . . . . .	57
	Illustration of the Premises behind Phonemic Procedures . . . . .	58
	First Premise: Sounds Tend to be Modified by Their Environment . . . . .	58
	Hypothetical Language A . . . . .	59
	Hypothetical Language B . . . . .	59
	Second Premise: Sound Systems Have a Tendency Toward Phonetic Symmetry . . . . .	59
	Third Premise: Sounds Tend to Fluctuate . . . . .	59
	Fourth Premise: Characteristic Sequences of Sounds Exert Structural Pressure on the Phonemic Interpretation of Suspicious Segments or Suspicious Sequences of Segments . . . . .	60

Chapter		Page
	Hypothetical Language C . . . . .	61
	Hypothetical Language D . . . . .	61
	Further Premises . . . . .	61
	Definition of a Phoneme as Based on the Premises . . . . .	63
	Uncertainties in the Application of Phonemic Premises . . . . .	63
	The Source and Validity of the Premises . . . . .	64
<u>ANALYTICAL PROCEDURES</u>		
5.	PRELIMINARY PROCEDURES . . . . .	67
	Preliminary Procedure A: Recording the Data . . . . .	67
	Preliminary Procedure B: Assuming the Accuracy and Completeness of the Problem . . . . .	68
	Preliminary Procedure C: Making a Phonetic Chart . . . . .	68
	Problem 1: Kalaba Dialect A . . . . .	68
	Preliminary Procedure D: Listing Suspicious Pairs of Sounds . . . . .	69
	Preliminary Procedure E: Listing Nonsuspicious Sounds . . . . .	71
	Problem 2: Kalaba Dialect B . . . . .	71
6.	ANALYTICAL PROCEDURE ONE-A: THE PHONEMIC SEPARATION OF SIMILAR SEGMENTS UPON FINDING THEM IN CONTRAST IN ANALOGOUS ENVIRONMENTS	73
	Problem 6: Kalaba Dialect F . . . . .	76
	Problem 7: Kalaba Dialect G . . . . .	77
	Problem 9: Restricted Tabascan Chontal A . . . . .	77
	Problem 15: Restricted Mazateco A . . . . .	78
7.	ANALYTICAL PROCEDURE ONE-B: THE PHONEMIC SEPARATION OF SIMILAR SEGMENTS UPON FINDING THEM IN CONTRAST IN IDENTICAL ENVIRONMENTS	80
	Problem 22: Kalaba Dialect T . . . . .	80
	Problem 23: Kalaba Dialect U . . . . .	82
	Problem 31: Restricted Zinza A . . . . .	83
	Problem 32: Restricted Badaga A . . . . .	83
	Problem 33: Restricted Oaxacan Chontal A . . . . .	83
8.	ANALYTICAL PROCEDURE ONE-C: THE PHONEMIC UNITING OF SIMILAR SEGMENTS UPON FINDING THEM IN MUTUALLY EXCLUSIVE ENVIRONMENTS . . .	84
	Problem 34: Kalaba Dialect AG . . . . .	84
	Problem 41: Kalaba Dialect AJ . . . . .	96
	Problem 69: Restricted Oaxacan Chontal B . . . . .	102
	Problem 70: Restricted Popoluca A . . . . .	102
	Problem 71: Restricted Aztec A . . . . .	102
9.	ANALYTICAL PROCEDURE ONE AMPLIFIED FOR SPECIAL APPLICATION TO PROBLEMS OF PITCH . . . . .	105
	Problem 85: Kalaba Dialect BY . . . . .	105
	Problem 97: Kalaba Dialect CK . . . . .	111
	Problem 101: Tone Dictation Type A . . . . .	112
	Problem 107: Restricted Zapoteco of Villa Alta A . . . . .	114
	Problem 108: Restricted Mandarin A . . . . .	115
10.	ANALYTICAL PROCEDURE TWO: CLUES FOR ANALYSIS GAINED FROM PHONETIC SYMMETRY . . . . .	116
	Analytical Procedure II-A: Phonetic Symmetry as a Supporting Criterion for Separating or Uniting Phonemes . . . . .	116
	Problem 111: Kalaba Dialect CQ . . . . .	116
	Analytical Procedure II-B: Lack of Symmetry as a Clue to Possible Error . . . . .	117

Chapter		Page
Problem 113:	Kalaba Dialect GS . . . . .	117
Problem 117:	Restricted English A . . . . .	119
Problem 118:	Kalaba Dialect CW . . . . .	120
Problem 126:	Restricted Maya A . . . . .	121
11.	ANALYTICAL PROCEDURE THREE: THE PHONEMIC UNITING OF SIMILAR SEGMENTS UPON FINDING THEM FREELY FLUCTUATING BUT NEVER IN CONTRAST . . . . .	122
Problem 127:	Kalaba Dialect DE . . . . .	122
Problem 128:	Restricted English B . . . . .	124
Problem 129:	Kalaba Dialect DF . . . . .	125
Problem 136:	Restricted Mixteco A . . . . .	126
Problem 137:	Restricted English C . . . . .	126
Problem 138:	Restricted English D . . . . .	127
Problem 139:	Fluctuation Dictation A . . . . .	127
12.	ANALYTICAL PROCEDURE FOUR: THE PHONEMIC INTERPRETATION OF SUSPICIOUS SEGMENT TYPES AND SEGMENT SEQUENCES BY ANALOGY TO NONSUSPICIOUS OR PREDOMINANT STRUCTURAL TYPES AND SEQUENCES . . . . .	128
Analytical Procedure IV-A:	Interpreting Segments as Consonants or Vowels . . . . .	128
Problem 140:	Kalaba Dialect DM . . . . .	128
Analytical Procedure IV-B:	Interpreting Sequences of Segments as Single Phonemes or Sequences of Phonemes . . . . .	131
Problem 142:	Kalaba Dialect DO	
Analytical Procedure IV-C:	Interpreting Single Segments as Sequences of Phonemes or Single Phonemes . . . . .	138
Problem 153:	Kalaba Dialect DZ . . . . .	138
Analytical Procedure IV-D:	Interpreting Segments as Under-Differentiated Phonemes . . . . .	141
Problem 158:	Kalaba Dialect EE . . . . .	141
Analytical Procedure IV-E:	Interpreting Segments as Over-Differentiated Phonemes . . . . .	142
Problem 159:	Kalaba Dialect EF . . . . .	142
Analytical Procedure IV-F:	Interpreting the Segments of Loan Words or of Native Words Under Pressure from a Trade Language . . . . .	142
Analytical Procedure IV-G:	Interpreting Segmental Changes Due to a Shift of General Quality . . . . .	143
Analytical Procedure IV-H:	Interpreting Sporadic Special Segments . . . . .	143
Problem 160:	Kalaba Dialect EG . . . . .	143
Analytical Procedure IV-I:	Interpreting Phonetic Syllables in Relation to Phonemic Syllables . . . . .	144
Problem 161:	Kalaba Dialect EH . . . . .	144
Analytical Procedure IV-J:	Interpreting Sequences as Close-Knit Syllable Nuclei . . . . .	147
Problem 166:	Kalaba Dialect EM . . . . .	147
Problem 167:	Kalaba Dialect EN . . . . .	149
Problem 182:	Restricted Shipibo A . . . . .	152
Problem 185:	Restricted Oaxacan Chontal C . . . . .	153
Problem 186:	Restricted Bolivian Quechua A . . . . .	153
Problem 187:	Restricted Huichol A . . . . .	153
Problem 188:	Restricted Aymara A . . . . .	153
Problem 189:	Restricted Oaxacan Chontal D . . . . .	153

Chapter		Page
	Problem 190: Restricted Aztec B . . . . .	154
	Problem 191: Restricted Oaxacan Chontal E . . . . .	154
	Problem 192: Restricted Lenzburg German A . . . . .	154
	Problem 193: Restricted Tabascan Chontal B . . . . .	154
	Problem 194: Restricted Chol A . . . . .	155
	Problem 201: Sapir's Language A . . . . .	156
	Problem 202: Sapir's Language B . . . . .	156
	Problem 203: Phonemic Quiz Type A . . . . .	156
<b>13.</b>	<b>ANALYTICAL PROCEDURES FURTHER AMPLIFIED FOR APPLICATION TO SPECIAL PROBLEMS OF BORDER PHENOMENA . . . . .</b>	<b>159</b>
	Problem 207: Kalaba Dialect FI . . . . .	159
	Problem 218: Kalaba Dialect FT . . . . .	168
	Problem 238: Restricted Mixteco B . . . . .	171
	Problem 239: Restricted Zoque A . . . . .	172
	Problem 240: Restricted Cuzco Quechua A . . . . .	172
	Problem 241: Restricted Mazateco P . . . . .	172
	Problem 242: Restricted Mazateco G . . . . .	173
	Problem 243: Restricted Mazateco D . . . . .	173
<b><u>DESCRIPTIVE PROCEDURES</u></b>		
<b>14.</b>	<b>TYPES OF DESCRIPTIVE STATEMENTS . . . . .</b>	<b>174</b>
	Descriptive Statement Type A: A Brief Technical Statement . . . . .	174
	Descriptive Statement Type B: A Brief Nontechnical Statement . . . . .	175
	Descriptive Statement Type C: A Key to Pronunciation . . . . .	175
	Descriptive Statement Type D: A Monograph on Phonemics . . . . .	175
	Descriptive Statement Type E: A Textbook on the Phonetics of Some Language . . . . .	176
	Descriptive Statement Type F: A Highlighted Technical Description . . . . .	176
	Descriptive Statement Type G: A Detailed Routine Technical Statement . . . . .	177
	Problem 244: Kalaba Dialect GN . . . . .	180
	A Working Outline for Determining Distribution of Phonemes in Phonological and Grammatical Units . . . . .	182
	Problem 245: Kalaba Dialect GO . . . . .	184
	Problem 247: Kalaba Dialect GP . . . . .	188
	Problem 253: Restricted Gulf Aztec A . . . . .	189
	Problem 256: Restricted English E . . . . .	190
<b>15.</b>	<b>SAMPLE DESCRIPTIVE STATEMENTS . . . . .</b>	<b>191</b>
	Sample Descriptive Statement A: Hungarian Phonemes, by Robert A. Hall, Jr. . . . .	191
	Sample Descriptive Statement B: The Segmental Phonemes of Brazilian Portuguese: Standard Paulista Dialect, by David W. Reed and Yolanda Leite . . . . .	194
	Sample Descriptive Statement C: Phonemic Acculturation in Zoque, by William L. Wonderly . . . . .	202
<b><u>ORTHOGRAPHICAL PROCEDURES</u></b>		
<b>16.</b>	<b>THE FORMATION OF PRACTICAL ALPHABETS . . . . .</b>	<b>208</b>
