## **PART I. CONTEXTS OF DEVELOPMENT: A TRANSACTIONAL APPROACH**

|   |    |
|---|----|
| Introduction to Part I: Perspectives on Development                   | 3  |
| The Maturational Perspective, 3                                       |    |
| The Transactional Model of Development, 4                             |    |
| Developmental Pathways and Intervention, 4                            |    |
| <br>  |    |
| CHAPTER 1 Attachment as a Context of Development                      | 7  |
| How Attachment Develops, 8  |    |
| Functions of Attachment, 8  |    |
| Patterns of Attachment, 11  |    |
| Attachment Classifications, 12  |    |
| Attachment, Class, and Culture, 19                                    |    |
| The Universality of Attachment, 21                                    |    |
| Attachment and Future Development, 21                                 |    |
| Parental Models of Attachment, 24                                     |    |
| Attachment Theory and Family Systems Theory, 28                       |    |
| The Attachment Perspective in the Assessment<br>of Young Children, 29 |    |
| Kelly and Her Mother: A Case Example, 30                              |    |
| <br>  |    |
| CHAPTER 2 Brain Development   | 39 |
| Sequence of Brain Development, 40                                     |    |
| Early Brain Growth: Synaptogenesis and Myelination, 40                |    |
| Synaptic Overproduction and Pruning, 42                               |    |
| Plasticity and Experience, 43   |    |
| Bonding, Attachment, and Brain Development, 43                        |    |
| Mirror Neurons and the Social Brain, 45                               |    |
| Can Parents Build Better Brains?, 46                                  |    |
| Risk and Protective Factors Influencing Brain Development, 47         |    |
| Stress, Trauma, and Brain Development, 49                             |    |
| Early Trauma and Brain Development, 51                                |    |
| Studies of Institutionally Deprived Young Children, 56                |    |

|                  |  |            |
|------------------|--|------------|
| <b>CHAPTER 3</b> | <b>Risk and Protective Factors: The Child, Family,<br/>and Community Contexts</b>        | <b>60</b>  |
|                  | Research on Risk and Resilience, 60  |            |
|                  | Protective Factors and Processes, 61   |            |
|                  | Risk Factors, 65   |            |
|                  | Conclusion, 101  |            |
|                  | Appendix 3.1. Summary of Risk and Protective Factors, 103                                |            |
| <br>             |  |            |
| <b>CHAPTER 4</b> | <b>Analysis of Risk and Protective Factors:<br/>Practice Applications</b>                | <b>105</b> |
|                  | How to Use Risk Factor Analysis, 105   |            |
|                  | Prediction of Risk: Assessing Current Risk<br>and Protective Factors, 106                |            |
|                  | Retrospective Analysis of Risk and Protective Factors, 116                               |            |
|                  |  |            |
|                  | <b>PART II. THE COURSE OF CHILD DEVELOPMENT</b>  |            |
|                  |  |            |
|                  | <b>Introduction to Part II: A Developmental Lens on Childhood</b>                        | <b>127</b> |
|                  | Barriers to Understanding the Child's Perspective, 127                                   |            |
|                  | Dynamics of Developmental Change, 129  |            |
|                  | Interactions between Maturation and Environment, 129                                     |            |
|                  | Thinking Developmentally in Assessment and Intervention, 130                             |            |
|                  | Organization of Developmental Chapters, 130  |            |
