

**PERSPECTIVES FOR SAFE USE
AND APPLICATION OF MODERN
BIOTECHNOLOGY IN LITHUANIA**

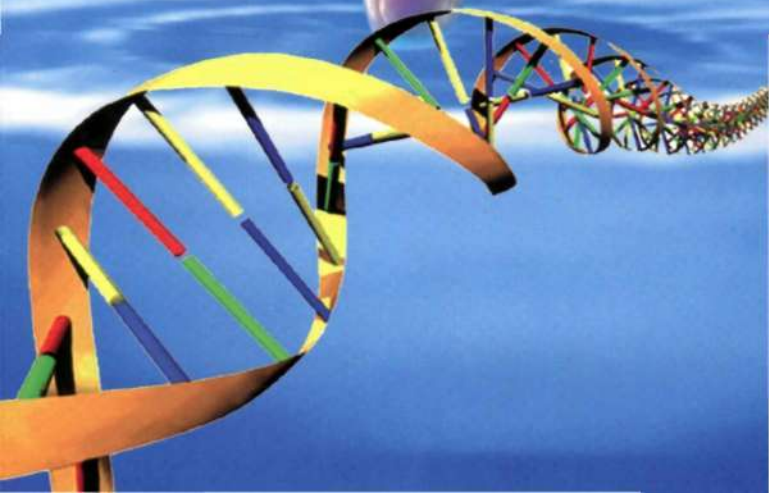

Table of Contents

| | |
|--|----|
| 1. PREFACE – INTRODUCTION | 5 |
| 2. GENETICALLY MODIFIED ORGANISMS (GMO): THEIR EFFECT ON ENVIRONMENT, HEALTH OF HUMANS AND ANIMALS, AND ON PRODUCTION OF ECOLOGICALLY CLEAN FOOD | 6 |
| 2.1. Trends in development and use of genetically modified organisms (GMO) | 6 |
| 2.2. Public perception of genetically modified organisms (GMO) and genetically modified (GM) food | 8 |
| 2.2.1. We do not need your Frankenfood | 10 |
| 2.2.2. Perception of GMO in Lithuania | 10 |
| 2.2.3. Perception of GMO in the US | 14 |
| 2.2.4. Perception of GMO in UK | 15 |
| 2.2.5. Anti-GMO sentiment in the European Parliament | 18 |
| 2.3. Understanding the GMO and GM Food | 19 |
| 2.3.1. Genetic engineering as a tool to produce GMO | 19 |
| 2.3.2. Production of GM food | 20 |
| 2.3.3. Development of genetically modified crops | 20 |
| 2.3.4. GM crops around the globe | 21 |
| 2.4. Future developments | 24 |
| 2.5. Safety of GMO and GM food | 24 |
| 2.5.1. Testing GMO safety | 24 |
| 2.5.2. Effects of GMO on the health of humans and animals | 25 |
| 2.5.3. Presumed toxicity of GMO: Showa Denko debacle | 27 |
| 2.5.4. Are GMO allergenic? | 28 |
| 2.5.5. GM food may have positive side effects like reduction of mycotoxin level | 29 |
| 2.5.6. Position of independent European science journalists regarding safety of GM food | 29 |
| 2.5.7. Conclusions about safety of GM food | 30 |
| 2.6. Environmental and ecological impacts of GMO | 31 |
| 2.6.1. Case study in UK: effect of GM oilseed rap on insect populations | 31 |
| 2.6.2. Is Bt corn toxic to insect? | 32 |
| 2.6.3. Honeybees vanish, leaving keepers in peril. Are GMO to blame? | 33 |
| 2.6.4. Can GMO cause environmental threats such as appearance of super weeds? | 34 |
| 2.6.5. How to prevent transgene escape? | 38 |
| 2.6.5.1. Keeping the transgene in the crop | 38 |
| 2.6.5.2. Transgenic mitigation | 39 |
| 2.6.6. Future directions | 40 |
| 2.7. GMO policy around the world | 41 |
| 2.8. Guidelines for the use of GMO and GM food | 43 |
| 2.8.1. GMO can ensure environmental sustainability and increase food production | 43 |
| 2.8.2. Establishing the sound scientific basis for GMO to be safe | 44 |
| 2.8.3. It is unrealistic to demand zero risks from GMO | 45 |
| 2.8.4. Herbicide-tolerant and pesticidal GE crops can reduce the use of agro-chemicals | 45 |
| 2.8.5. Biotechnology companies have to be totally liable for any harm GMO to environment and public health | 46 |
| 2.9. Recommendations for safe use of GMO in Lithuania | 46 |
| 2. 10. Literature | 46 |
| 3. BIOMEDICAL RESEARCH AND INDUSTRY: BIOSAFETY AND ETHICS ISSUES | 48 |
| 3.1. Introduction | 48 |
| 3.2. Biopharmaceuticals | 49 |
| 3.3. Genetic Modification of Humans | 50 |
| 3.4. Embryos and Stem Cells | 52 |
| 3.5. Situation in Lithuania | 53 |

| | |
|---|-----------|
| 3.6. Conclusions..... | 54 |
| 3.7. References | 54 |
| 4. BIOTECHNOLOGY AND COMMERCE | 55 |
| 4.1. Definition | 55 |
| 4.2. Basic concepts..... | 55 |
| 4.3. Biotechnology industry in the world and Lithuania | 56 |
| 4.4. Conclusions and recommendations | 58 |
| 4.5. References | 58 |
| 5. ENVIRONMENTAL BIOTECHNOLOGY | 59 |
| 5.1. Introduction..... | 59 |
| 5.2. Bioremediation | 59 |
| 5.2.1. Waste water and industrial effluents | 59 |
| 5.2.2. Drinking and Process Water | 60 |
| 5.2.3. Air and waste gases | 60 |
| 5.2.4. Soil and land treatment | 60 |
| 5.2.5. Solid waste..... | 61 |
| 5.3. Detection and Monitoring | 61 |
| 5.3.1. Detection and monitoring of pollutants..... | 61 |
| 5.3.2. Detection and monitoring of microorganisms used for bioremediation | 62 |
| 5.3.3. Detection and monitoring of ecological effects | 62 |
| 5.4. Prevention | 62 |
| 5.4.1. Process improvement..... | 62 |
| 5.4.2. Product innovation | 63 |
| 5.5. Advances of Genetic Engineering..... | 63 |
| 5.5.1. Industrial processes..... | 63 |
| 5.5.2. Alternative fuels..... | 63 |
| 5.5.3. Pollution control..... | 63 |
| 5.6. Legislation | 63 |
| 5.7. The application of environmental biotechnology in Lithuania..... | 64 |
| 5.8. Conclusions and recommendations | 64 |
| 6. FUSION OF BIOTECHNOLOGY AND NANOTECHNOLOGY | 66 |
| 6.1. Nanobiotechnology..... | 66 |
| 6.2. Biotechnology and nanoscale materials science | 66 |
| 6.3. DNA arrays and nanoassemblies | 68 |
| 6.4. Protein arrays and nanoassemblies..... | 69 |
| 6.5. Nanobiotechnology in Lithuania | 70 |
| 6.6. Conclusions and recommendations | 71 |
| 6.7. References | 72 |
| AUTORIŲ TRUMPOS BIOGRAFIJOS..... | 73 |
