

HUMAN EVOLUTIONARY BIOLOGY

CAMBRIDGE

MICHAEL P. MUEHLENBEIN

Contents

List of contributors	page	vii		
Preface		ix		
Part I Theory and Methods		1		
1 Evolutionary Theory		3		
Douglas J. Futuyma				
2 The Study of Human Adaptation		17		
A. Roberto Frisancho				
3 History of the Study of Human Biology		29		
Michael A. Little				
4 Genetics in Human Biology		48		
Robert J. Meier and Jennifer A. Raff				
5 Demography		74		
James Holland Jones				
6 History, Methods, and General Applications of Anthropometry in Human Biology		92		
Noël Cameron and Laura L. Jones				
7 Energy Expenditure and Body Composition: History, Methods, and Inter-relationships		113		
Peter S. W. Davies and Alexia J. Murphy				
8 Evolutionary Endocrinology		127		
Richard G. Bribiescas and Michael P. Muehlenbein				
9 Ethical Considerations for Human Biology Research		144		
Trudy R. Turner				
Commentary: a Primer on Human Subjects Applications and Informed Consents		150		
Michael P. Muehlenbein				
Part II Phenotypic and Genotypic Variation		155		
10 Body Size and Shape: Climatic and Nutritional Influences on Human Body Morphology		157		
William R. Leonard and Peter T. Katzmarzyk				
11 Human Adaptation to High Altitude		170		
Tom D. Brutsaert				
12 Skin Coloration		192		
Nina G. Jablonski				
13 Classic Markers of Human Variation		214		
Robert J. Meier				
14 DNA Markers of Human Variation		238		
Michael E. Steiper				
15 Ten Facts about Human Variation		265		
Jonathan Marks				
16 The Evolution and Endocrinology of Human Behavior: a Focus on Sex Differences and Reproduction		277		
Peter B. Gray				
Part III Reproduction		293		
17 Human Mate Choice		295		
David P. Schmitt				
18 Mate Choice, the Major Histocompatibility Complex, and Offspring Viability		309		
Claus Wedekind and Guillaume Evanno				
19 Why Women Differ in Ovarian Function: Genetic Polymorphism, Developmental Conditions, and Adult Lifestyle		322		
Grazyna Jasienska				
20 Pregnancy and Lactation		338		
Ivy L. Pike and Lauren A. Milligan				
21 Male Reproduction: Physiology, Behavior, and Ecology		351		
Michael P. Muehlenbein and Richard G. Bribiescas				
Part IV Growth and Development		377		
22 Evolution of Human Growth		379		
Barry Bogin				

23	Variation in Human Growth Patterns due to Environmental Factors	396	29	Evolutionary Medicine and the Causes of Chronic Disease	502
	Stanley J. Ulijaszek			Paul W. Ewald	
24	Evolutionary Biology of Hormonal Responses to Social Challenges in the Human Child	405	30	Beyond Feast–Famine: Brain Evolution, Human Life History, and the Metabolic Syndrome	518
	Mark V. Flinn			Christopher W. Kuzawa	
25	Human Biology, Energetics, and the Human Brain	425	31	Human Longevity and Senescence	528
	Benjamin C. Campbell			Douglas E. Crews and James A. Stewart	
26	Embodied Capital and Extra-somatic Wealth in Human Evolution and Human History	439	32	Evolutionary Psychiatry: Mental Disorders and Behavioral Evolution	551
	Jane B. Lancaster and Hillard S. Kaplan			Brant Wenegrat	
Part V Health and Disease		457	33	Industrial Pollutants and Human Evolution	566
				Lawrence M. Schell	
27	Evolutionary Medicine, Immunity, and Infectious Disease	459	34	Acculturation and Health	581
	Michael P. Muehlenbein			Thomas W. McDade and Colleen H. Nyberg	
28	Complex Chronic Diseases in Evolutionary Perspective	491		Index	603
	S. Boyd Eaton
