

THE IDENTIFICATION OF FUNGI

An Illustrated Introduction
with Keys, Glossary, and
Guide to Literature

Frank M. Dugan

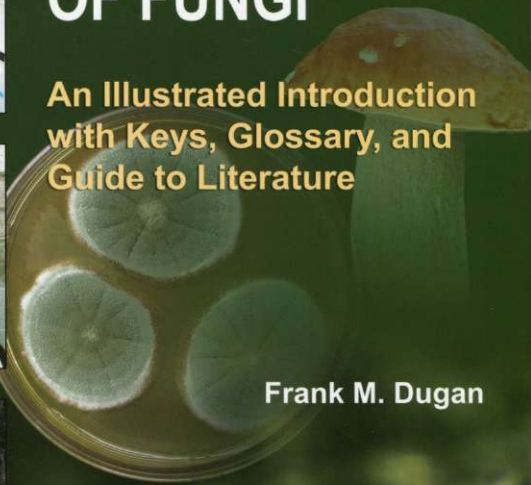

Table of Contents

Introduction.....	1
Characters of the major groups.....	2
1. "Lower" fungi.....	2
Protoctistan "lower" fungi.....	3
Plasmodiophoromycota.....	3
Dictyosteliomycota.....	3
Acrasiomycota.....	4
Myxomycota.....	5
Oomycota.....	8
Hyphochytriomycota.....	12
Labyrinthulomycota.....	13
More "lower" fungi: Eufungi.....	13
Chytridiomycota.....	13
2. Zygomycota.....	18
Zygomycetes.....	18
Trichomycetes.....	25
3. Ascomycota (ascomycetes).....	26
Ascomycetous yeasts.....	27
Archiascomycetes.....	29
Laboulbeniomycetes.....	30
Plectomycetous ascomycetes.....	32
Pyrenomycetes.....	37
Loculoascomycetes.....	47
Discomycetes.....	59
4. Basidiomycota (basidiomycetes).....	70
Basidiomycetous yeasts.....	71
Ustilaginomycetes (Heterobasidiomycetes).....	72
Urediniomycetes (Heterobasidiomycetes).....	73
Septobasidiales (Heterobasidiomycetes).....	74
Tulasnellales.....	75
Hymenomycetes.....	75
Jelly fungi (Dacrymycetales and Heterobasidiomycetes).....	76
Holobasidiomycetes.....	77
Exobasidiales.....	78
Aphylophorales.....	78
Agaricales.....	87
Gasteromycetes.....	93
5. Deuteromycetes (mitosporic fungi).....	101
Blastomycetes.....	101
Coelomycetes.....	102
Sphaeropsidales (pycnidial fungi).....	103
Melanconiales (acervular fungi).....	105
Hyphomycetes.....	107
Agonomycetales (Mycelia Sterilia).....	116
